

REMARKS

The amendments to the application have been made to (1) replace the original PCT international patent application claims 1-27 with a new set of claims numbered as claims 28-55 (wherein some of the claims of the new set of claims are the same as some of the original claims and some have been amended with respect to dependencies) (2) make some changes to the headings in the application to conform with U.S. practice, and (3) explicitly include the ABSTRACT of the WO 2004/033336 A1 publication on a separate page.

Applicants believe that these amendments are fully supported by the international application as originally filed and do not believe that these amendments constitute new matter.

Entry of the amendments is respectfully requested.

Respectfully submitted,

WOOD, PHILLIPS, KATZ, CLARK & MORTIMER
